## Kleinburg New Forest North Native Tree and Shrub Planting with TD Corporate Employees

TD employees and family members gathered at Kleinburg New Forest North to take part in an annual TD Tree Day event. Participants were given a safety talk and planting demonstration and quickly got under way to plant native trees and shrubs in this ongoing restoration site.

This plant material will also be part of TRCA's Young Tree and Shrub Monitoring and Maintenance Program. A portion of plant material is tagged with a unique ID number, measurements are taken and general observations of the tree or shrub are recorded. This program tracks success of plants and helps provide maintenance strategies required to assist with plant survival.

These types of community based stewardship activities improve the overall health and function of the watershed. They also educate on the importance of greenspace with urban settings and valuable role they play in human and wildlife health.
