Watershed Wide Cleanup Campaign, Heart Lake Road with Peel Region Conservation Youth Corps Students

An enthusiastic group of thirty-five students from Peel Conservation Youth Corps (CYC), participated in a Watershed Wide Cleanup along Heart Lake Road, to remove litter and illegal dumping along the adjacent natural areas to prevent contaminants from entering the designated Provincially Significant Wetlands bordering Heart Lake Rd.

The group were educated on adverse effects of litter, garbage and chemicals leaching into these wetlands and the valuable contribution clean-up efforts play in protecting these sensitive areas.

Students were also given an overview of TRCA's Road Ecology Monitoring Program which has been taking place along Heart Lake Rd since 2011. Trained volunteers have been collecting wildlife mortality data related to wildlife vehicle collisions (WVCs). In partnership with the City of Brampton a wildlife passage and wildlife directional fencing have been installed to assist with safe passage between the wetlands.

This stewardship activity allows students to better understand these important ecosystems and their value to both human and wildlife health.
