

OCTOBER 2017

LOCATION:
Victory Park, Mimico Creek Watershed

DATE:
Saturday October 21, 2017

REGION/MUNICIPALITY:
Region of Peel, City of Mississauga

PARTNERS:
Toronto and Region Conservation (TRCA), Region of Peel, City of Mississauga, The Living City Foundation, and TD Employees

Victory Park, Native Tree and Shrub Planting with TD Employees

TD employees joined TRCA staff at Victory Park in Mississauga to help enhance this natural area and provide additional habitat for local wildlife along a reach of Mimico Creek.

After a welcome and a planting demonstration to ensure quality, the enthusiastic participants planted and mulched 450 native trees and shrubs.

A group of participants were also engaged as citizen scientists to conduct TRCA's Young Tree and Shrub Monitoring and Maintenance Program (YTMP). Through this program, a percentage of plants are tagged with a unique identification number, measurements are taken and general observations recorded. For a period of three to five years data will be collected and maintenance performed to track success of plant material. This information provides valuable data on effects from storm events, insect infestation, disease and wildlife browse and provides valuable information to plan maintenance strategies within urban restoration sites.

Activities of this nature allow residents to be involved in improving the overall health and function of the watershed and provides a greater appreciation and understanding of natural spaces within urbanized environments..

POSITIVE ENVIRONMENTAL IMPACTS

Vegetation Planted	# of Pieces Planted	Total Area Enhanced (square metres)	# of Participants	Participant Hrs Contributed
Native Trees & Shrubs	450	675	64	192
Total	450	675	64	192
