## Pickering and Ajax Dykes Rehabilitation Project Class Environmental Assessment (PADR EA)

### Toronto and Region Conservation Authority (TRCA)

TRCA is investigating remedial solutions for the rehabilitation of two (2) existing flood control dykes, referred to as the Pickering and Ajax Dykes, located north of Hwy 401 between Brock Road and Church Street, in the City of Pickering and Town of Ajax. In the 1980s, TRCA constructed the dykes to provide flood protection for the Pickering and Ajax Special Policy Areas. Recent studies have identified that the dykes are at risk of failure as they do not meet current engineering design standards and factors of safety (FOS) for flood control facilities. The purpose of this study is to identify and evaluate remedial solutions and select a preferred solution to rehabilitate the dykes to meet current engineering standards and FOS, while maintaining or increasing the level of flood protection service associated with the existing height of the dykes.

This project is being undertaken through Conservation Ontario's Class Environmental Assessment for Remedial Flood and Erosion Control Projects. For further information on this project please visit: [www.trca.ca/PADR](http://www.trca.ca/PADR)

**THE FIRST PUBLIC INFORMATION CENTRE FOR THE PICKERING AND AJAX DYKE REHABILITATION ENVIRONMENTAL ASSESSMENT WILL BE HELD ON OCTOBER 30TH 2019.** At this meeting the study team will be presenting the evaluation of alternative solutions, a preferred alternative solution, and an update on consultation activities completed to date for this project.

Please come out to share your ideas and concerns about this exciting project!
