Start Date: Spring 2021

Completion Date: Spring 2021

**Timeline is subject to change*

Toronto and Region Conservation Authority (TRCA), in partnership with the City of Toronto, recently completed major maintenance works on an erosion control structure along the shoreline of Palace Pier Court. The objective of the work was to repair the shoreline structure in order to provide long-term erosion protection and reduce the risk to public safety. Shoreline repair works were completed from late October to December 2020.

Final site restoration is scheduled to take place in Spring 2021, as weather conditions allow. To ensure public safety, the previous work area (highlighted in red) will remain closed until site restoration is complete. Please respect all fencing that remains on-site and do not enter the closed area.

When restoration takes place in Spring 2021, the areas highlighted in orange will also be closed to facilitate restoration work. The work is anticipated to take 2-3 weeks in duration. During construction hours, equipment will cross the multi-use trail at the designated crossing point to transport material to the restoration site. The multi-use trail will remain open during the workday for public use and Traffic Control Persons will be on-site to stop pedestrian and cyclist traffic when equipment is crossing the path. During this time, the trail crossing will be fully open with no interruptions to traffic flow on evenings, weekends, and holidays.

For your safety and the safety of others, please obey all posted construction signs and stay clear of the work area and equipment. Your cooperation and patience with this undertaking is appreciated.
