**Start Date:** Week of April 5, 2021

**Completion Date:** Late April 2021

*\*Timeline is subject to change*

Toronto and Region Conservation Authority (TRCA), in partnership with the City of Toronto, recently completed major maintenance works on an erosion control structure along the shoreline of Palace Pier Court. The objective of the work was to repair the shoreline structure in order to provide long-term erosion protection and reduce the risk to public safety.

Final site restoration is scheduled to start the week of April 5, 2021, as weather conditions allow. The work is expected to take two to three weeks in duration. To ensure public safety, the previous work area (highlighted in red) will remain closed until site restoration is complete. Please respect all fencing that remains on-site and do not enter the closed area.

During construction hours, equipment will cross the multi-use trail at the designated crossing points to transport material to the restoration site. The multi-use trail will remain open during the workday for public use and Traffic Control Persons will be on-site to stop pedestrian and cyclist traffic when equipment is crossing the path. Please consider using the recommended detour routes during these times. The trail crossings will be fully open with no interruptions to traffic flow on evenings, weekends, and holidays.

For your safety and the safety of others, please obey all posted construction signs and stay clear of the work area and equipment. Your cooperation and patience with this undertaking is appreciated.
